SALESPERSON	SHIP DATE	SHIP VIA	STATUS	TERMS
Don		TRUCK/PARCEL		CHECK/WIRE

ITEM #	DESCRIPTION	QTY	UNIT PRICE	TOTAL
REC210	REC 210 WATT SOLAR PANEL	24	575.00	13,800.00
UPM15X	GS SOLAR ARRAY MOUNT, POST-TOP	2	2,270.00	4,540.00
DRILL	CUSTOM DRILLING FEE	2	100.00	200.00
MNPV-6	MIDNITE SOLAR COMBINER BOX	2	88.00	176.00
WIREFIT	WEATHERTITE WIRE FITTINGS	12	3.00	36.00
GLUGS	SOLAR PANEL GROUND LUGS	24	4.00	96.00
MNEPV-10	CIRCUIT BREAKER, DC, 10 AMP	12	15.00	180.00
MC4-30	SOLAR PANEL WIRE, #10, MC4, BLK	12	35.00	420.00
MS4024/2 POWER CNTR	ASSEMBLED POWER CENTER & BREAKERS W/ 2 MAGSINE INVERTERS, 8000W, 120/240V	1	5,390.00	5,390.00
OBFM80	OUTBACK CHARGE CONTROL, 80A, INSTALLED	2	699.00	1,398.00
ME-BMK	MAGNUM BATTERY MONITOR, INSTALLED	1	200.00	200.00
OB-BTS	OUTBACK BATTERY TEMP SENSOR	2	25.00	50.00
IC-4/0-10	4/0 INVERTER CABLES, 10 FEET	2	140.00	280.00
SO-6-85-33/24	SOLAR ONE BATTERY, 1690 A/h @ 24V	1	8,480.00	8,480.00
LA302DC	DELTA LIGHTNING ARRESTOR, LA302DC	2	45.00	90.00
PVENT-24	POWER BATTERY VENT FAN, 24V	1	80.00	80.00
RELAY12	RELAY KIT FOR VENT FAN	1	25.00	25.00
SPW-SO-24	FLOW-RITE BATTERY WATERING KIT	1	250.00	250.00
BLS-24	BATTERY DESULFATOR, 24V	1	98.00	98.00
10KWISUZU	ISUZU DIESEL GENSET, 10KW, 120/240V	1	6,095.00	6,095.00
MERC-50	MAGNUM REMOTE DISPLAY & CONTROL	1	0.00	
HYDRO	FREE BATTERY HYDROMETER	1	0.00	

Comments or Special Instructions	SUBTOTAL	TOTAL
1. 15% restocking fee on returned merchandise	\$41,884.00	
	TAX RATE	0.000%

2. 5% cancellation fee after order is accepted.
3. Warranty claims are made directly with manufacturer
4. Special order items cannot be cancelled or refunded.
5. Prices and availability subject to change without notice.
7. Customer to supply 8" schedule 80 steel pipe for UPM mount.

TAXES AND SHIPPING CHARGES NOT INCLUDED.

TAX	\$0.00
S & H	
OTHER	\$0.00
TOTAL	\$41,884.00
PAYMENT RECEIVED	\$0.00
BALANCE DUE	\$41,884.00

Over 5,000 watts of solar electricity from two pole-mounted arrays provide serious charging potential for this robust 24-volt system! An average 5-hour solar day can accumulate over 25 kilowatt/hours of power. Two Magnasine 4,000 watt inverters are stacked together for 8,000 watts continuous output in a 120/240 volt configuration, providing ample sinewave power for common household appliances, power tools, and deep well pumps. This is a very complete collection of top-quality components that have been carefully matched together for maximum system efficiency and reliability. The major electronic components are delivered as a pre-assembled, pre-tested power center unit that is ready to screw to the wall, so most of the technical work is already done for you. Connect wires to solar arrays, battery, generator, and the output line to your home, and you are ready to make your own electricity! Magnum Energy sinewave inverters feature an easy-to-use display and simple programming menus, and are made in the USA. The inverters come already mounted to the electrical enclosure (power center) and are wired and tested for immediate use. Overall design is clean and compact. The Magnum Battery Monitor is a small interface unit that turns your Magnum Remote Control into a sophisticated battery monitoring system that is an essential component for success with solar electricity. The monitor gives quick and accurate at-a-glance battery status, as well as the technical information you need to keep your system operating efficiently. Outback's FM60 charge controllers are top-quality MPPT (maximum power point tracking) units that deliver up to 30% more energy from your solar array, and MPPT works best when you need it most. FM80 features easy digital programming and a lighted display. Batteries are the heart of any off-grid system, and HUP Solar One batteries are the best choice for renewable energy systems with a 10-year warranty and up to 20-year lifespan. Top-quality Solar One 2-volt cells are built to industrial standards and housed in a heavy steel enclosure. This battery has more capacity than 16 Trojan L16H batteries! Solar One shipping is FREE to destinations in 48 states. Battery maintenance is easy with the Flow-Rite Millennium SPW (single-point watering) system. The SPW allows you to refill the battery electrolyte without the need to open a cell cap! Every cell is watered to the perfect level every time, and all you have to do is operate a simple hand pump. No spill or mess, and no exposure to corrosive liquids. Voodoo Solar recommends the Battery Life Saver battery desulfator for use with flooded lead-acid batteries to maintain maximum performance and extended battery life. The BLS saves your battery from premature aging, and it works automatically! Nearly every off-grid system has occasional need for a generator to deal with extended overcast days, or unusually high energy usage periods. Diesel engines are the top choice for all heavy-duty fossil-fueled equipment because of fuel economy and long engine life, and these traits make diesel a good choice for a generator set too. The 10 kilowatt Isuzu generator set is both quiet and reliable, and is a good size for this system. This Japanese engine starts easily and burns clean like a good diesel should. Fuel economy is extremely good. Generator shipping is FREE to destinations in 48 states. This system contains all of the main components, but the customer must supply wire, conduit and miscellaneous supplies to assemble the system and connect it to a power distribution system. Customer also supplies one 8" schedule 80 steel pipe set in concrete, for each of the two solar array mounting structures (two pipes total).
